

JOHN GWEN ISAAC D. AUSTRIA

Obando, Bulacan | 09484485458 | johngwenisaacaustria@gmail.com | <https://h1.nu/portfolio-austria>

EDUCATION

Bachelor of Science in Computer Engineering

Major in Machine Learning

October 2022 – September 2026

Polytechnic University of the Philippines – Sta. Mesa, Manila

WORK EXPERIENCE

Computer Engineering Intern

July 2025 – August 2025

- Designed UI/UX mockups for web applications and assisted with network device deployment and troubleshooting using Cisco Packet Tracer
- Utilized Photoshop and technical documentation to support field teams and cross-functional engineering projects

Computer Hardware Intern

August 2024 – September 2024

- Provided technical support including hardware diagnostics, PC assembly/disassembly, and product demonstrations
- Resolved hardware issues through systematic troubleshooting and maintained accurate inventory records

RELEVANT PROJECTS

IskoMate: An Academic Assistant for Real-Time Monitoring of Student Engagement

Thesis

- Engineered a real-time student engagement detection system integrating two custom ai models, a Python Flask backend, and a Flutter mobile app, delivering sub-second behavior classification and secure, actionable participation metrics for educators.

Nappr – Location-Based Commute Alarm

Mobile Application

- Developed a location-based commute alarm application featuring real-time geofencing, background tracking, and OSRM routing API integration, delivering a standalone application that provides users with automated, location-triggered alerts and comprehensive commute history tracking.

QuizCraft: Learning Companion

Website

- Developed an AI-powered study platform that automatically transforms uploaded learning materials into customized quizzes and flashcard decks, delivering a responsive, SaaS-level academic workspace featuring organized study folders, interactive study tools, and automated progress tracking.

RiceGuard — Rice Plant Health Classification AI

Website

- Deployed a diagnostic web application utilizing Streamlit, Scikit-learn, and computer vision techniques to extract and classify image features, achieving 94.17% accuracy with an optimized Support Vector Machine (SVM) model for real-time crop disease detection.

TECHNICAL SKILLS

Programming Languages & Frameworks: Python, JavaScript, HTML, CSS, Tailwind CSS, React, Flask, Node.js, Flutter

Database & Data Management: Firebase Firestore, SQLite, SQLCipher (AES-256 encryption)

Computer Vision & Machine Learning: OpenCV, MediaPipe, YOLOv8, TFLite, Scikit-learn

Developer Tools & Platforms: Git/GitHub, VS Code, Vercel, Streamlit, Render,

Design: Adobe Photoshop, Figma, Canva, Microsoft Word, PowerPoint, AutoCAD, Tinkercad

SOFT SKILLS

- Flexible and fast learner
- Strong communication skills
- Effective problem-solving skills
- Team collaboration and leadership
- Detail-oriented and organized
